Before

Condition: diffuse redness and impaired barrier.

After four weeks

Solution: Creamy Cleanser, Hydrating Serum, Dual Action Redness Relief, Hydrator Plus Broad Spectrum SPF 30, Collagen Hydrator.

Photos not retouched.

Key ingredients:

Niacinamide – a potent, yet calming antioxidant that delivers multiple important benefits to the skin. It helps to reduce transepidermal water loss (TEWL) and improve barrier function. This is critical for healthy, bright skin. Additionally, it helps reduce redness, skin yellowing and promotes an even skin tone.

Inflacin® – a patented cosmetic ingredient shown to reduce the sub-clinical inflammation that contributes to aging.

Dimethyl Sulfone and **Silybum Marianum Fruit Extract** – work synergistically to reduce redness, increase hydration and soothe reddened skin.

Panthenol – hydrates the skin.

Bisabolol – a component of chamomile that provides potent calming and MMPi properties to improve and maintain skin.

Ceramide NP – supports the renewal of the skin's natural protective layer and forms an effective barrier against moisture loss; improves long-term moisturization and protects skin from external offenders.

Directions for use: After cleansing, apply to the entire face and neck in the morning and evening for barrier repair and redness reduction. Follow with the appropriate PCA SKIN® broad spectrum SPF product in the daytime and moisturizer in the evening.
